Height: 75 mm (2.95")

Width: 165 mm (6.5")

Weight: 422 g

Description

This charming heav-gauge sterling silver model of a swimming and dabbling mallard duck, is carefully cast and beautifully hand chased to create a serene and likelike model. Her male drake partner is also available to buy.

Whether living in an urban environment or in the country, we have a fondness for mallard ducks.

Langfords heavy-quality models are cast in sterling silver using the traditional, centuries-old technique of lost wax casting where molten silver is poured into a mould that has been created by means of a wax model. Once the silver has solidified, the wax model is melted and drained away. Each model is then individually hand chased to produce the lifelike effect seen in the finished piece.

Whether living in an urban environment or in the country, we have a fondness for the mallard. This large silver mallard duck is carefully cast in a pose where she is serenely sitting on water. Her silver mallard partner is available separately.

For a truly personal model, we can work from photographs to capture the true likeness of your own pet or favourite animal cast in sterling silver. Contact us for more details.
