Sold

REF: 5248

Height: 160 mm (6.3")

Width: 190 mm (7.48")

Depth: 100 mm (3.94")

Weight: 478 g

Description

Antique handmade silver teapot in a style made popular during the reign of George I. The pear-shaped octagonal body and domed cover have an ebonised fruitwood handle and finial. The pot holds approximately four cups of tea.

A silver teapot pours like no other and sterling silver is the perfect material for making teapots:

- No other material can be fashioned into such elegant and detailed forms, reflect light as beautifully, and a perfectly formed silver teapot spout will never drip.
- Second only to diamonds, silver has the highest thermal conductivity of any material, meaning that tea leaves can be brewed at a higher temperature than in any other teapot, allowing the tea leaves to fully release their flavours.
- That same high thermal conductivity means a silver teapot will retain heat and keep tea hot for much longer.
- Unlike porcelain and ceramic teapots, silver is sturdy and long-lasting, does not shatter and the occasional dent can be debruised.
