Octagonal antique silver teapot

Reid & Sons

Sold

REF: 6672

Height: 180 mm (7.09")

Weight: 695 g

Description

This superb quality antique silver teapot is entirely handmade in the multi-faceted Queen Anne style. The octagonal pear-shaped body is hand-raised and the lid, cast swan-neck spout and mounts are all similarly multi-faceted. The fruitwood handle is comfortable to hold and the teapot has capacity for approximately four cups of tea.

A silver teapot pours like no other and sterling silver is the perfect material for making teapots:

- No other material can be fashioned into such elegant and detailed forms, reflect light as beautifully, and a perfectly formed silver teapot spout will never drip.
- Second only to diamonds, silver has the highest thermal conductivity of any material, meaning that tea leaves can be brewed at a higher temperature than in any other teapot, allowing the tea leaves to fully release their flavours.
- That same high thermal conductivity means a silver teapot will retain heat and keep tea hot for much longer.
- Unlike porcelain and ceramic teapots, silver is sturdy and long-lasting, does not shatter and the occasional dent can be deburred.
