Description

These table knives are pieces from a new Louis XVI pattern, heavy-gauge silver-plated cutlery service for 12 place settings, selected by Jacopo and Isabella.

Inspired by late-18th-century French design, the Louis XVI design features neoclassical symmetry, clean straight lines and refined botanical motifs. The handles show a reed and ribbon border, acanthus leaves, bead accents, and a small shell or floral cartouche at the tip. The straight-sided handles are tapered with squared or slightly rounded terminal ends.

The knives have stainless steel blades for ease of cleaning in the dishwasher.
