Depth: 130 mm (5.12")

Weight: 1239 g

Description

Model of a stag that has been cast in solid silver and hand chased in fine detail. It is beautifully proportioned and finely hand-chased to give very realistic detail.

This quality model is cast in sterling silver using the traditional, centuries-old technique of lost wax casting where molten silver is poured into a mould that has been created by means of a wax model. Once the silver has solidified, the wax model is melted and drained away. Each model is then individually hand chased to produce the lifelike effect seen in the finished piece.

Like C J Vander, Langfords' silversmiths can work from photographs to capture the true likeness of your own pet or favourite animal cast in sterling silver. Contact us for details.
