Height: 90 mm (3.54")

Width: 125 mm (4.92")

Weight: 220 g

Description

Whether living in a town or the country, the labrador is one of the most popular family dogs and this fine-looking silver labrador model is skilfully cast and chased. Langfords' heavy quality models are cast in sterling silver using the traditional, centuries-old technique of lost wax casting where molten silver is poured into a mould that has been created by means of a wax model. Once the silver has solidified, the wax model is melted and drained away. Each of our models is then individually hand chased to produce the lifelike effect seen in the finished piece.

We have almost 100 cast models of animals and birds to choose from, but for a truly personal model, we can work from photographs to capture the true likeness of your own pet or favourite animal cast in sterling silver. Contact us for more details.
